SUSTAINABILITY STUDIES

CURRICULUM

ELECTIVES

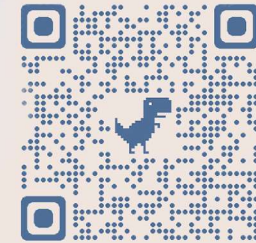

Choose from over 80 electives in three areas of focus:

*Environmental Health

*Social Equity

*Economic Vitality, Politics, & Policy

See QR code for full advisement sheet (including all elective options)

CORE

1134. Introduction to Sustainability Studies

Pick your practicum

334. Environmental Justice Practicum

364. Local Food Systems Practicum

384. Heritage Farming Practicum

434. Synthesis of Sustainability Perspectives & Innovations

499. Sustainability Independent Capstone project

The Capstone Project allows the students to apply lessons from the sustainability minor in the context of the major discipline. Faculty mentors provide guidance for the Research or Creative Project as it develops over the course of 2 semesters.

This program is designed to work with your major to open you up to policies and practices for designing a more sustainable future. Whether you're studying Engineering, Economics, or Art, the *Sustainability Studies Program* is designed to give you the tools and approaches you need.

With faculty from a diverse range of fields, you'll be able to get the most out of your degree—giving you flexible and creative options to create your future.

WHO WE ARE
